Biography

My name is Pawan Upadhyay. I am an independent scientist and independent interdisciplinary researcher working in Physics, Biblical Studies, Soul Science, and Economic Science. My work is driven by a deep curiosity to understand the physical universe, the spiritual foundation of life, and the economic systems that shape human society. In physics, I have proposed Pawan Upadhyay's Pressure–Curvature Law of Gravity and introduced the concept of Pressure Waves within the PPC Law of Gravity. These ideas offer a fresh perspective on gravitational behavior by integrating pressure fields with spacetime curvature. In the field of economics, I have contributed original insights aimed at stabilizing global financial systems. Through my independent analysis and timely theoretical interventions, I worked to protect and support world economies during the Brexit period and the global disruptions of the COVID-19 era. My research also explores Soul Science, focusing on the nature of consciousness, the spiritual identity of human beings, and the connection between the physical body and the immortal soul. Through Biblical Studies, I seek harmony between scientific reasoning and scriptural truth, examining creation, divine order, and spiritual reality. As an independent researcher, I value intellectual freedom, open inquiry, and interdisciplinary thinking. I publish my work on open-access platforms to ensure global accessibility and to contribute meaningfully to scientific, spiritual, and economic understanding.
